

1. Multiplication Table for Odd Numbers (1-5)

```
for (int i = 1; i <= 5; i++)
{
    if (i % 2 == 0) continue;
    for (int j = 1; j <= 10; j++)
    {
        int result = i * j;
        if (result % 2 == 0)
            Console.Write(result + " ");
        if (result % 5 == 0)
            Console.Write("* ");
        if (result > 20)
            break;
    }
    Console.WriteLine();
}
```

2. Sum of Even and Odd Numbers (1-10)

```
int evenSum = 0, oddSum = 0;
for (int i = 1; i <= 10; i++)
{
    if (i % 2 == 0)
        evenSum += i;
    else
        oddSum += i;
    if (i == 5)
        Console.WriteLine("Halfway there");
}
Console.WriteLine("Even Sum: " + evenSum);
Console.WriteLine("Odd Sum: " + oddSum);
```

3. Matrix Pattern with Markers

```
for (int i = 1; i <= 3; i++)
{
    for (int j = 1; j <= 3; j++)
    {
        if (i == j)
            Console.Write("D ");
        else if ((i + j) % 2 == 0)
            Console.Write("E ");
        else
            Console.Write("O ");
    }
    Console.WriteLine();
}
```

4. Nested Loop with Break on Condition

```
for (int i = 1; i <= 3; i++)
{
    for (int j = 1; j <= 5; j++)
    {
        if (j == 3 && i == 2)
            break;
        if (j % 2 == 0)
```

```

        Console.Write(j + " ");
    if (j == 1)
        Console.WriteLine("* ");
    }
    Console.WriteLine();
}

```

5. Search in 2D Grid

```

for (int i = 1; i <= 3; i++)
{
    for (int j = 1; j <= 3; j++)
    {
        int val = (i - 1) * 3 + j;
        if (val == 5)
            Console.WriteLine("Found ");
        if (val % 2 == 0)
            Console.WriteLine("Even ");
        if (val > 7)
            Console.WriteLine("High ");
        Console.WriteLine(val);
    }
}

```

6. Multiplication Table Skipping Multiples of 4

```

for (int i = 1; i <= 5; i++)
{
    for (int j = 1; j <= 10; j++)
    {
        int result = i * j;
        if (result % 4 == 0)
            continue;
        if (result % 2 == 0)
            Console.WriteLine(result + "* ");
        if (result % 3 == 0)
            Console.WriteLine(result + "# ");
        if (result % 5 == 0)
            Console.WriteLine(result + "@ ");
        Console.WriteLine();
    }
}

```

7. Print Square of Numbers with Flags

```

for (int i = 1; i <= 5; i++)
{
    for (int j = 1; j <= 1; j++)
    {
        int square = i * i;
        if (square % 2 == 0)
            Console.WriteLine("Even ");
        if (square > 10)
            Console.WriteLine("Big ");
        if (square < 10)
            Console.WriteLine("Small ");
        Console.WriteLine("Square of " + i + " is " + square);
    }
}

```

```
}
```

8. All Numbers 1-10 Mark Even/Odd/Multiple of 5

```
for (int i = 1; i <= 10; i++)
{
    for (int j = 1; j <= 1; j++)
    {
        if (i % 2 == 0)
            Console.Write("Even ");
        if (i % 2 != 0)
            Console.Write("Odd ");
        if (i % 5 == 0)
            Console.Write("Five ");
        Console.WriteLine("-> " + i);
    }
}
```

9. Nested Counter with Conditions

```
int counter = 1;
for (int i = 1; i <= 3; i++)
{
    for (int j = 1; j <= 3; j++)
    {
        if (counter % 2 == 0)
            Console.Write("E ");
        if (counter == 5)
            Console.Write("M ");
        if (counter % 3 == 0)
            Console.Write("T ");
        Console.WriteLine(counter++);
    }
}
```
